TECHNICAL SERVICES · WELL CONTROL EQUIPMENT

WCE SME Technical Review and Open Workshop

Joining instructions and agenda · Subsea Superintendents · Houston, Monday 19 to Thursday 22 October 2026

DATES	DAILY HOURS	VENUE	CONVENED BY
Mon 19 – Thu 22 Oct 2026	**08:00 – 17:00**	**4425 Westway Park Blvd, Suite 170, Houston, TX 77041**	**Lee Arnold, WCE Manager**

Thank you for joining the WCE SME Technical Review and Open Workshop. The week brings the Subsea Superintendents together to work hands on with the tools the fleet now reports through, to review the WCE technical standards with an external specialist, and to agree a prioritised action list with owners and dates.

Shape of the week

- **Days 1 and 2, training review.** Hands on with the reporting tools (WCGRRT and SSORT), the SACRED dashboards, the precharge process and the Argo Navis maintenance planning tool. Everyone posts real reports on the training test asset.
- **Days 3 and 4, open forum.** Technical standards with Andrew Dingee, the API Std 53 gap analysis, TOMs, CBM lessons learned, SACRED as the governed repository, and the action list.

Intended outcome

A clear, prioritised action list with agreed ownership and next steps, and a clear, detailed direction for the Well Control Equipment and MPD Seminar in Q1/Q2 2027.

Every session ends by adding to one list: the action, the owner, the date.

Joining instructions

Arrival

- Please arrive by **07:45 on Monday 19 October** for sign-in and the site safety induction. The opening starts at 08:00 sharp.
- Venue: **Seadrill, 4425 Westway Park Blvd, Suite 170, Houston, TX 77041**. Report to reception.
- Each day runs 08:00 to 17:00, with breaks at 10:00 and 14:30 and lunch at 12:00.

Please bring

- ☐ Your **Seadrill laptop**, charged, with its charger, and with **Microsoft Edge or Google Chrome** up to date.
- ☐ Your **Seadrill network sign-in** working (VPN if you are off the office network). The tools and dashboards are served from the Seadrill network.
- ☐ Access to the **WellControl SharePoint site**. Please open it once before Monday to confirm.
- ☐ Your own examples: a recent rig visit, BOP test, CBM or maintenance plan you would like to discuss.

Hands-on sessions

- All practical work is done on the **SSCE Equipment** training asset. It never appears in fleet counts, notifications for it go to the office only, and the class's posts are removed afterwards.
- The precharge session uses training well names and posts nothing.
- The Argo Navis session uses a test plan in test mode. Nothing reaches a rig.

Before you travel

- Travel and accommodation through your usual Seadrill travel arrangements.
- No pre-reading is required. A trainee workbook is issued on the day.
- Please think about one task that takes longer than it should on the rig today. It is the starting point for Thursday's efficiency forum.

Contacts

- **Lee Arnold**, WCE Manager: lee.arnold@seadrill.com
- **Dan Plant**, Technical Services – Subsea: daniel.plant@seadrill.com

Agenda

Lee opens the week. Dan presents the training review and the SACRED material. The group owns the rest. Sessions marked TO BE CONFIRMED are held and will be confirmed before the day.

Day 1 · Monday 19 October	TRAINING REVIEW, PART 1 · THE REPORTING TOOLS, HANDS ON	
07:45 – 08:00	**Arrival, sign-in and site safety induction**	Reception
08:00 – 08:30	**Opening** Safety minute; roles and responsibilities; expectations for the four days and for the training review.	Lee Arnold
08:30 – 10:00	**WCGRRT: rig visit and daily reports** Equipment entries, photographs and captions; report date and file name; the common mistakes and how the tool now guards against them; posting from the rig, including the outbox when the connection drops.	Dan Plant
10:00 – 10:15	Break	
10:15 – 12:00	**WCGRRT: BOP testing** BOP function test, EDS, acoustic, EHBS and drawdown forms; attachments; Post and the receipt.	Dan Plant
12:00 – 13:00	Lunch	
13:00 – 14:30	**SSORT: CBM inspections and the pre-deployment checklist** CBM inspection and NOV's five-level grade scale; test records attached to the equipment entry; NOV's usage data on the annular, gate valve and door CBMs; the pre-deployment checklist (FRM-00-0168 Rev 9) with the packer attestation and cavity photographs; Post to OEM and what NOV receives.	Dan Plant
14:30 – 14:45	Break	
14:45 – 17:00	**Exercise: one report of each type** Every participant produces and posts one report of each type on the SSCE Equipment asset and sees it arrive on the dashboard within ten minutes. One report per workspace; each participant on their own allocated date, so nothing overwrites.	All

Day 2 · Tuesday 20 October	TRAINING REVIEW, PART 2 · PRECHARGE, DASHBOARDS, ARGO NAVIS, THE LOOP	
08:00 – 10:00	**Precharge process** The request form, the calculation, the issued sheet and its PDF; the notification loop, where the record lives and the two signatures, all under MOC. Worked on verified rigs under training well names; nothing is posted.	Dan Plant
10:00 – 10:15	Break	
10:15 – 12:00	**The SACRED dashboards** The Rig Visit Dashboard tab by tab (report list, rig monitoring, CBM heatmap, the Errors button, the full-report viewer); the BOP Fleet Planning page; the WCE Certificate of Conformance dashboard and SSCE requests; the AAB tab and the Seadrill Bulletin Board, from advisory to acknowledgement; Ask SACRED AI.	Dan Plant
12:00 – 13:00	Lunch	

13:00 – 14:30	**Argo Navis: planning and executing Between Well Maintenance** Hands on with a test plan, end to end: • Opening a rig's plan and saving at any stage. • The scope challenge and deferrals; tasks grouped by SFI, with BOP work (SFI 331 and 332) driving BOP % and the BOP ready date. • Review by the regional reviewers and the scope freeze. • Executing: completing tasks, break-in work, the built-in job plan checklists. **HOLD POINT** **Daily reporting requirements (15 minutes, discussion).** At the point in the exercise where the first daily report is posted, the session stops to agree the requirement: • **When and by whom:** the rig posts the **Daily Summary Report twice a day**, after each shift handover, from Argo Navis. The planner no longer issues it. Who on the rig posts it, and what happens when a report is late. • **What is inside:** the project header (rig, BOP, project type, data date and time, rig manager, OIM, TSL, DSL, subsea supervisor); maintenance day; original and current finish; plan variance and float to the BOP need date in hours; critical path and SIMOPS; project % and BOP % complete; milestones (baseline, estimated, actual); break-in work and delays; quality and rig reliability actions; lessons learned; work completed in the last cycle and planned for the next; general comments. • **What has to be correct before it is posted:** the progress and actual finishes, any break-in work raised, and the people on board for the crew in place. • **Who it goes to:** automatically by email, with the PDF attached and a link to the full schedule on the BOP Fleet Planning page: **To** the rig manager, assistant rig manager, subsea supervisor, TSL, DSL, electrical supervisor and MPD supervisor of the rig, and the WCE office leads; **Cc** all TSC WCE Managers, Superintendents and Planners. A line also goes in the plan's Teams chat. Then: close-out, and the close-out pack filed for eDocs.	Dan Plant, Lee Arnold
14:30 – 14:45	Break	
14:45 – 15:30	**The loop** How the tools connect today and how the rest will be; the TSC Help Centre, hands on; what a failure looks like at each step and who sees it.	Dan Plant, Lee Arnold
15:30 – 16:15	**What is coming** The next six months on the rig and in the office.	Dan Plant
16:15 – 17:00	**Feedback** What is hard on the rig today, and what the tools should do next. Straight onto the action list.	All
Evening	Dinner and social evening TO BE CONFIRMED	

Day 3 · Wednesday 21 October — TECHNICAL STANDARDS, API STD 53, TOMS

08:00 – 08:45	**Executive address** TO BE CONFIRMED	Introduced by Lee Arnold
08:45 – 09:00	**WCE technical standards: where we stand** The list of WCE standards, their owners and state, and where they must align with API and the OEMs.	Lee Arnold

09:00 – 12:00	**Technical standards workshop, part 1** Procedures, technical standards, planning and technical document checklists; SME input from the group. Break 10:00 – 10:15.	Andrew Dingee (external), Lee Arnold hosting
12:00 – 13:00	Lunch	
13:00 – 15:00	**API Std 53, 5th edition against 4th: the gap analysis** The consolidated gap document walked through, then open discussion. Outcome: actions assigned to named people, with every change to MPD and Well Control procedures managed through MOC.	Ronnie Peeples, with Dan Plant and Jacob
15:00 – 15:15	Break	
15:15 – 16:30	**Technical Operating Manuals (TOMs)** The WCE approach, structure and priorities; drafting the decision tree for one monthly fleet activity in the room.	Lee Arnold, group
16:30 – 17:00	**Team building** TO BE CONFIRMED	

Day 4 · Thursday 22 October — STANDARDS PART 2, SACRED, LESSONS LEARNED, THE ACTION LIST

08:00 – 09:00	**CBM lessons learned and the CBM workshop** What implementation taught us; who signs what, where the record lives, and the one change that removes the most double handling.	Dan Plant, group
09:00 – 12:00	**Technical standards workshop, part 2** The standards the group chose to work, drafted and challenged in the room. Break 10:00 – 10:15.	Andrew Dingee (external), Lee Arnold hosting
12:00 – 13:00	Lunch	
13:00 – 14:30	**SACRED as the governed WCE technical repository** Document accuracy and revision control, lessons-learned capability, usability: what the group used on Days 1 and 2.	Dan Plant, group
14:30 – 14:45	Break	
14:45 – 15:45	**Lessons learned, technical improvements and the efficiency forum** Recurring fleet issues and good practice, sorted into standards, TOMs, maintenance requirements or SACRED content; and everyone brings one efficiency item.	Group, Lee Arnold chairing
15:45 – 16:30	**The action list** Every item from the four days, prioritised, with an owner and a date.	Lee Arnold
16:30 – 17:00	**Direction for the WCE and MPD Seminar, Q1/Q2 2027, and close**	Lee Arnold

We look forward to seeing you in Houston.
Lee Arnold, WCE Manager · **Dan Plant**, Technical Services – Subsea
