Star symbol and brand governance

The star symbol used in these draft assets was extracted from the Seadrill Brand Guidelines PDF supplied for this project, rather than redrawn as a generic star. This is a draft internal concept, not an approved Seadrill sub-brand. The guidelines state that bespoke sub-brand logos and co-branding should be reviewed by Seadrill Communications. Do not add the official Seadrill wordmark to these assets unless the branding team approves the lock-up.

Usage

Use light versions on white/light backgrounds and dark versions on navy/dark backgrounds. App icons intentionally omit small text. Use PNG for general-purpose placement and SVG wrappers for scalable layout workflows; note that the SVGs embed the raster artwork. Typography is a close system-font approximation and should be replaced with Meta Pro when available/licensed.
