

Dashboards and Reporting Tools — three-day class

Agenda and timings · 08:00 to 17:00 each day · seven teaching hours a day · week plan item 22 · draft 23
September 2026

Each day: 08:00 start · 10:00 break (15 min) · 12:00 lunch (60 min) · 14:30 break (15 min) · 17:00 close. Precharge theory and process take the whole morning of day 2. No trainee ever posts: reports are saved locally, the trainer drops them into a training folder that a second scanner configuration reads and deploys to the sandbox site, so the fleet dashboard never sees them.

Day 1 — the reporting tools, hands on

Time	Module	Led by
08:00 – 10:00	WCGRRT: rig visit and daily reports; equipment entries, photographs and captions; report date and filename; the Capella-week mistakes (posting before finishing, entry dates left behind) and how the tool now guards them	Dan / tools session content
10:00 – 10:15	Break	
10:15 – 12:00	WCGRRT: BOP function test, EDS, acoustic, EHBS and drawdown forms; attachments; Post and the receipt; Load latest posted	Dan
12:00 – 13:00	Lunch	
13:00 – 14:30	SSORT: CBM inspection and NOV's five-level grade scale; pre-deployment checklist with the packer attestation and cavity photographs; Post to OEM	Dan / Brad Waldron
14:30 – 14:45	Break	
14:45 – 17:00	Exercise: every trainee produces one report of each type on the SSCE Equipment asset, saves it locally, and sees it land on the sandbox dashboard via the training folder	all

Day 2 — precharge (morning) and the dashboards (afternoon)

Time	Module	Led by
08:00 – 10:00	Precharge theory: API 16D methods A, B and C; fluid volume and deliverable above shear; temperature and depth corrections; MAWHP and required shear; qualification examples on real rigs	Dan (precharge responsible) / Precharge Pro session content
10:00 – 10:15	Break	
10:15 – 12:00	Precharge process: the request form, the calculator, the issued sheet and its PDF, the notification loop, who signs, where the record lives, the MOC; worked examples	Dan
12:00 – 13:00	Lunch	
13:00 – 14:30	Rig Visit Dashboard tab by tab: report list and dates, rig monitoring, CBM heatmap and grade history, the Errors button, the report viewer and printing, Ask SACRED AI	Dan
14:30 – 14:45	Break	
14:45 – 17:00	BOP Fleet Planning Dashboard; SSCE Requests Dashboard and the COC dashboard; the AAB tab and the Seadrill Bulletin Board once live	Dan / Eric Rachall (AAB)

Day 3 — the loops and the operating discipline

Time	Module	Led by
08:00 – 10:00	How a post becomes a dashboard row: HTTP intake, SharePoint, OneDrive, the scanner task, the server; what each failure looks like and who fixes it	Dan
10:00 – 10:15	Break	
10:15 – 12:00	The notification loops (precharge, rig visit, CBM to OEM, AAB), the workbook of recipients and the test mode; the SSCE request and decision cycle	Dan
12:00 – 13:00	Lunch	
13:00 – 14:30	Scanner warnings and what to do about them; large reports; the archive and replaced-copies folders; the design principles from the first loop	Dan
14:30 – 14:45	Break	
14:45 – 17:00	Assessment: one scenario end to end on the training folder (post, notify, find on the dashboard, print); feedback session that feeds the next tool revisions	all

Pack still to build (pinned until the server migration is signed off): agenda per day with timings (this page), slide decks per module on the Seadrill template, trainee workbook with the exercises, trainer's script with the answers, the training-folder scanner configuration. Dates, venue and audience: Dan.
